

## Regatta Setup Guide for Sailing Challenge

### Step 1 – Information

	<ul style="list-style-type: none"> <li>⇒ Specify the name of the regatta. At best make the name as explicit as possible</li> <li>⇒ Specify the country where this regatta is located</li>   <li>⇒ Specify the nearest Town / Area / Bay where this regatta starts</li> </ul>
<p>Challenge Objective</p> <p><input checked="" type="radio"/> Cruise <input type="radio"/> Training <input type="radio"/> Regatta</p>	<p>Choose one of the challenge objectives</p> <ul style="list-style-type: none"> <li>⇒ Cruise = choose it, if you challenge is about connecting places (e.g., from a marina to a bay, bay to another bay, etc.)</li> <li>⇒ Training = choose it, if it is a “short” circuit (3-12 NM), covering the different wind angles (closed hauled, beam reach, broad reach)</li> <li>⇒ Regatta = choose it, if it is an official/known regatta, or if you just want to establish a regatta.</li> </ul>
<p>Type</p> <p><b>Open for all</b></p> <p>Available On</p>	<ul style="list-style-type: none"> <li>⇒ By default, “Open for all” and not modifiable so far. It will be enabled in the future for “On Invitation” / “Sponsored”</li> <li>⇒ Specify, when this regatta is open to run</li> </ul>
<p><input type="checkbox"/> Fixed Start Time (HH:MM:SS)</p>	<ul style="list-style-type: none"> <li>⇒ Specify, if there is a fixed starting time (e.g., like a regatta organized by a sailing club). <b>Important:</b> if you specify it, then the chrono starts at the specified time, even if you haven’t crossed the starting line. Only use this option, if you plan to organize a one-time regatta (e.g., on a Saturday at 10AM)</li> </ul>
<p>Available until</p>	<ul style="list-style-type: none"> <li>⇒ Specify, when this regatta is no longer available (by default, let it be available for 1 year or as much as you would like)</li> </ul>

<input type="radio"/> Solo <input type="radio"/> Crew <input checked="" type="radio"/> Solo + Crew	⇒ Specify, if the challenge should be run alone (solo) or with a crew or you don't bother (Solo + Crew). Unless you really care, just leave the default value (Solo + Crew)
<input checked="" type="radio"/> HN <input type="radio"/> IRC <input type="radio"/> ORC <input type="radio"/> PHS	⇒ Choose, one of the existing rating. The rating will be used to calculated the compensated time. If a sailor didn't add the related rating then the sailor won't be listed in the compensated ranking tables (but of course the sailor will be listed in the total time ranking tables).
<p>Regatta Instruction</p> 	⇒ Specify any related regatta instructions. If it is just a challenge between friends, you may leave this blank.

<p>Regatta Description</p> 	<p>⇒ Provide a description of your regatta. If it is just a challenge between friends, you may leave this blank.</p>
---	--

## Step 2 – Start & Finish Line

Use Select on Map

### Start Line

Zoom on the map to the position where you would like to put the first point of the starting point. Tap longer on this point, the red position icon is displayed. Change position to add the second point of the starting line (tap again long until red position icon is displayed).

Placement of the starting line:

- Don't place the starting directly at the exit of a Marina or anchoring place.
- Put it enough "far away", which allows sailor to gently prepare their boat
- Make the line as long as possible, so that it can be easily crossed. Also keep in mind that maybe sailors from nearby marinas would like to run this regatta as well (see example of St. Tropez)
- Try to align the starting line with any visible elements (buildings, buoys, etc.).
- If your regatta returns to the departure point (e.g., marina), then keep in mind that you also need to set up the finish line. The finish line should not be too close to the starting line otherwise you risk that sailors cross "accidentally" the finish line and won't complete the regatta, if you placed waypoints.

## Finish Line

Same approach as for the starting line, just select tap on the map to define the two points drawing the finish line.

Placement of the starting line:

- Don't place the finish line too close to the entry of a marina, bay or beach.
- Put it enough "far away", which allows sailor to gently prepare their boat for entering the marina or anchoring.
- Make the line as long as possible, so that it can be easily crossed
- Try to align the starting line with any visible elements (buildings, buoys, etc.).
- If your regatta returns to the starting point, the put the finish line enough away from the starting line and not within the area where sailors are heading to while having passed the starting line. Or you can put the finish before the starting line

## Some good examples

Starting line enough away from marina's exit

Finish line before starting line (not accidental crossing possible)

### Very long start line

Starting line allowing sailors from 3 different marinas (Saint Maxime, Port Grimaud & St Tropez) to run the same regatta

### Some bad examples

Starting line too close to the exit of the marina

## Step 3 – Adding Waypoints

Use Select on Map

Zoom on the map to the position where you would like put your first waypoint (tap long).

<p style="text-align: center;"><b>ADD WAYPOINT</b></p> <p><input checked="" type="radio"/> circle</p> <p><input type="radio"/> cardinal North</p> <p><input type="radio"/> cardinal South</p> <p><input type="radio"/> cardinal West</p> <p><input type="radio"/> cardinal East</p> <p style="text-align: center;"> <span style="background-color: red; color: white; border-radius: 15px; padding: 5px 15px;">CANCEL</span> <span style="background-color: green; color: white; border-radius: 15px; padding: 5px 15px; margin-left: 10px;">NEXT</span> </p>	<p>For each waypoint, you will need to select the type of the waypoint as follows:</p> <ul style="list-style-type: none"> <li>- Circle: sailors would need to enter the circle</li> <li>- Cardinal North: sailors would need to pass the cardinal</li> <li>- Cardinal South: sailors would need to pass the cardinal</li> <li>- Cardinal West sailors would need to pass the cardinal</li> <li>- Cardinal East: sailors would need to pass the cardinal</li> </ul>
<p style="text-align: center;"><b>ADD WAYPOINT</b></p> <p><u>0.5</u></p> <hr style="border: 1px solid blue;"/> <p style="text-align: center;"> <span style="background-color: red; color: white; border-radius: 15px; padding: 5px 15px;">CANCEL</span> <span style="background-color: green; color: white; border-radius: 15px; padding: 5px 15px; margin-left: 10px;">SUBMIT</span> </p>	<p>After choosing the waypoint type, you need to specify the radius of the circle respectively the length of the cardinal. All measures in nautical miles (NM)</p>

### Placement of waypoints

- Generally, if there is no need to place a waypoint, don't do it (e.g. crossing over to an island)
- Make the circle radius / cardinal length big enough. We recommend at least 0.5NM for a circle radius or 1NM for a cardinal.... Nothing is more frustrating that missing a waypoint while running a regatta.
- Try to align the waypoints with some objects (cap, buildings, buoys, etc.)

## Some good examples

### Long Cardinal South & Aligned on a cap

### Long cardinals & Aligned on different caps
